Fire Marshal

Fire Turnout Gear Cleaning Facility

WASHING MACHINE & DRYER

- The need was apparent that the MC Fire Academy Instructors required frequent cleaning of their Turn-Out Gear due to extensive exposure on the fire training ground
- The MC Fire Marshal's Office required cleaning of their Turn-Out Gear after each fire investigation.
- A plan to purchase an industrial washer and dryer unit for the MC Fire Marshal's Office and Fire Academy was established.
- Discussion of a shared service initiative to provide any Fire Department in the county with the availability of this service to assist them in meeting the requirements set forth in the NFPA regarding the cleaning of Turn Out Gear

FIRE APPARATUS DRIVING SIMULATOR

- In partnership with the MC Sheriff's Office and MC Police Academy planning to provide an Emergency Vehicle Training Simulator was discussed
- The Simulator would be located at the MC Sheriff's Office STARS Training building in Freehold
- A Fire Apparatus module would be included to train drivers/operators of Fire Apparatus for any Fire Department in the County
- Instructors from the MC Fire Academy will be trained as instructors on the module and will conduct all Fire Department training at the site.
